Department of Labor Recognizes Zammo.ai and Our Ability

Zammo.ai has been recognized by the US Department of Labor (US DOL) for providing AI that helps people with disabilities find employment.

October is National Disability Employment Awareness Month (NDEAM). The US DOL's Office of Disability Employment Policy (ODEP) hosts an annual national event, which was held on October 20th in 2020. The event explores the crucial role of accessible technology in relation to their 2020 theme, "Increasing Access and Opportunity" for people with disabilities. At the event, Deputy Assistant Secretary of Disability Employment Policy, Jennifer Sheehy, mentioned Zammo.ai while introducing a video that demonstrates how even a smaller organization like Our Ability can engage their users via voice and chatbot in their job search.

Deputy Assistant Secretary of Labor
for Disability Employment Policy

"Getting Our Ability on voice assistants was easier than I thought possible, and a dream come true,"

John Robinson
CEO, Our Ability

"Getting Our Ability on voice assistants was easier than I thought possible, and a dream come true," said Robinson in the video. "Disabilities that limit vision, mobility, and dexterity may make it difficult to login and access our web portal. So, we wanted to get voice assistance, but we couldn't justify the investment to go out with an RFP to a digital agency, that's when we met Zammo."

In the video presented, Our Ability CEO, John Robinson and Zammo.ai Chief Engineer, Guy Tonye, demonstrate how Zammo.ai makes it easy for disabled people to create their job profile through Our Ability using just their voice. The two discuss how Zammo.ai has extended the accessibility of disabled people and how this is only the beginning for what voice assistants can do for their organization and accessibility at large.
